

Proposed Programme 29th Workshop

Sunday 24th January

Chairman Professor Reinhard Bretzel

- 17.30** **Opening Lecture**
Comparison of islet transplantation with intensive medical therapy in type 1 diabetes mellitus
Prof Garth Warnock *University of British Columbia, Vancouver*
- 18.15** **Ernst-Friedrich Pfeiffer Memorial Lecture**
Islet actions of incretins and other antidiabetic drugs - lessons for preservation of beta cell function following transplantation
Prof Peter Flatt *University of Ulster*
- 19.00** **Welcome Reception**

Monday 25th January

Session 1 08.30-12.30 EPITA Joint Session

- 8.30-9.00** **Overview of Simultaneous Pancreas and Kidney Transplantation, Pancreas after Kidney Transplantation and Pancreas Transplantation alone**
Johann Pratschke, *Innsbruck*
- 9.00-9.30** **Metabolic impact of pancreas and islet transplants**
Antonio Secchi, *Milan*
- 9.30-10.15** **Oral presentations 1-6**
- 10.15-11.00** **Coffee**
- 11.00-11.30** **Trials and tribulations of transplantation**
Dr Chris Metcalfe *University of Bristol*
- 11.30-12.00** **Pancreas transplantation: Impact on microvascular complications of Type 1 Diabetes**
Dr Richard Smith *University of Bristol*
- 12.00-12.45** **Oral Presentations 7-12**

12.45-14.00 Discussion Groups

Graft thrombosis in pancreas transplantation: Prediction, prevention and diagnosis *Anil Vaidya*

Stem Cells: The future of beta cell replacement therapies ? *Julie Kerr Conte*

What makes a good islet – protocols for donor selection and islet isolation *Torbjorn Lundgren*

Session 2 14.30-18.30

Protecting the Beta Cell Pre and Post-transplantation

14.30-15.00 Early detection of immune responses before and after beta cell replacement

Bart Roep *Leiden University*

15.00-15.30 Tacrolimus: Good or bad for islets ?

Piero Marchetti *University of Pisa*

15.30-16.00 Coffee

16.00-16.30 Activation of inflammation and leukocyte migration in pancreas and islets following brain death

Luis Fernandez *University of Wisconsin*

16.30-17.00 Lipidomic Profiling of Isolated Rat and Human Islets

Barbara Ludwig *University of Dresden*

General Assembly 17.30-18.30

Tuesday 26th January

Session 3 09.00-12.30 Technology in Practice

9.00-9.30 CSII and CGM : When and how to use them in 2010 ?

Michel Pinget *University of Strasbourg*

9.30-10.00 Glucose monitoring in elite athletes

Ian Gallen *Wycombe Hospital, UK*

10.00-10.30 Oral Presentations 13-16

10.30-11.15 Coffee

11.15-12.00 Oral Presentations 17-21

12.00-14.00 Lunch/Moderated Posters

Session 4 14.00-17.00

14.00-14.30 Update on stem cells for diabetes
Julie Kerr Conte *Lille*

14.30-15.00 Oral Presentations 22-25

15.00-15.45 Coffee

Poster Award Ceremony 15.45-16.00

Presidential Debate 16.00-17.00

This house believes that improvement in islet and pancreas transplant outcomes will be achieved primarily by development of better immunosuppressive regimens

For the motion: Roep

Against the motion: Warnock

Concluding Remarks 17.00-17.30

Farewell Dinner 19.30
