Innsbruck

MEDIZINISCHE UNIVERSITÄT
INNSBRUCK

After the success of their first joint symposium in January of 2011, AIDPIT and EPITA are happy to repeat this fruitful experience and to announce the Second Joint AIDPIT/EPITA Winter Symposium, that will take place in Innsbruck from January 29-31, 2012. Invited lecturers will discuss cutting-edge therapies for the treatment of diabetes and novel concepts in basic and translational research in the field. The Young Investigators Workshops introduced last year, and designed more specifically for trainees, residents and PhD students, were attended with enthusiasm. These interactive sessions, chaired by authorities, will be held again this year, focusing on the critical steps of the islet isolation procedure or the management of complications of pancreas transplantation. Join us in Innsbruck to learn about and discuss new developments in this exciting field of basic and clinical research!

Frantisek Saudek
AIDPIT Chair

Roger Lehmann
AIDPIT Vice-President

Johann Pratschke
EPITA Chairman-elect

Thierry Berney
EPITA Chair

ORGANIZING COMMITTEE

Frantisek Saudek, Prague, Czech Republic
Thierry Berney, Geneva, Switzerland
Johann Pratschke, Innsbruck, Austria
Roger Lehmann, Zürich, Switzerland

AIDPIT Board

President

Frantisek Saudek, Prague, Czech Republic

Vice-President

Roger Lehmann, Zürich, Switzerland

Paola Maffi, Milan, Italy

Helmut Arbogast, Munich, Germany

Thierry Berney, Geneva, Switzerland

Laurence Kessler, Strasbourg, France

Torbjorn Lundgren, Stockholm, Sweden

Jochen Seissler, Munich, Germany

Fabio Vistoli, Pisa, Italy

EPITA Board

Chairman

Thierry Berney, Geneva, Switzerland

Johann Pratschke, Innsbruck, Austria

Mathias Brendel, Dresden, Germany

Torbjorn Lundgren, Stockholm, Sweden

Frantisek Saudek, Prague, Czech Republic

Alexander Schaapherder, Leiden, The Netherlands

Antonio Secchi, Milan, Italy

Abstract Submission

Registration

available on

www.aidpit.org and www.esot.org

IMPORTANT DATES/DEADLINES

Abstract Submission Opening

September 1, 2011

Abstract Submission Closing

November 20, 2011

HOT TOPICS

- Technology in the daily care of the diabetic patient
- Diabetic foot syndrome after transplantation
- Technical advances in pancreas transplantation
- Advances in immunosuppression for pancreas transplantation
- Chemokine targeting in clinical islet transplantation
- Tregs as therapeutic tools for islet rejection
- Stem cell-derived therapy for type 1 diabetes
- Cell-to-cell interactions in the islet of Langerhans

PRESIDENTIAL DEBATE

Cell therapy versus technology as the future cure of type 1 diabetes

YOUNG INVESTIGATORS WORKSHOPS

Critical steps in the islet isolation procedure
Management of surgical complications of pancreas transplantation
