Artificial Insulin Delivery
Pancreas and Islet Transplantation
Study Group of the European Association for the Study of Diabetes

Support Opportunities

Introduction

The European Pancreas and Islet Transplant Association (a section of ESOT) and the Study Group on Artificial insulin Delivery, Pancreas and Islet Transplantation (a section of EASD) are partnering for the best success of this consolidated meeting.

About the Program

The AIDPIT/EPITA Winter Symposium hot topics are:

- New trends in insulin therapy
- Continuous glucose monitoring in diabetes
- Thrombosis in pancreas transplantation
- Ischemia-reperfusion injury in pancreas transplantation
- Pancreas transplant alone
- Expanding the pancreas donor pool
- GLP-1 analogues in islet transplantation
- Mesenchymal stem cells in islet transplantation
- Beta cell neogenesis
- Immunology of islet transplantation

Support Options

Several support opportunities can be offered. We encourage you to secure exhibition space at the EPITA-AIDPIT Winter Symposium to maximize your exposure (see floorplan attached). Customized support opportunities can be arranged by directly contacting the AIDPIT Treasurer.

Acknowledgements

For their contributions, all supporters will be recognized on meeting signage, in the on-site program book and on the ELITA-ELTR Winter meeting website.
